I. (Q.No. 1-10) Read the following passage.

An eight-year-old child, Tess, heard her parents talking about her little brother, Andrew. All she knew was that Andrew was very sick and her parents did not have enough money for the treatment. They were moving into a smaller house because they could not afford to stay in the present house after paying the doctor's bills. He needed a costly surgery now and there was no one to loan them the money, so her parents lost their hope and gave up their efforts.

When Tess heard her daddy say to her tearful mother, "Only a miracle can save him now," she went to her room and pulled a jar of coins from a cupboard. She poured all the money out on the floor and counted it carefully. Holding the jar tightly, she made her way to the medical store and placed it on the glass tube.
